## Where Nature fought...and lost!

At the time of year when the wind plays gently across the yellowing fields, the farmsteads are as peaceful as a happy dream.

But underneath the quiet surface of the country scene, a mighty struggle has been going on—a war against heat, rust, frost, drought and insects. Every year brings a new emergency, and the farmer must know where to turn, what measures to take, to keep the crops coming and the livestock fed.

During these periods of stress, farm machinery is the farmer's best ally. He uses it to build irrigation ditches, spread fertilizer, and harvest crops before the frost arrives. With it he compresses hay into compact bales that can be

stored out of the reach of the weather, kills weeds, and wages chemical warfare on insects.

Massey Harris and Ferguson machines have always had a prominent role in aiding the farmer to bring nature under control. As new and more efficient implements are devised, farming will become more predictable, more profitable, to the farmer—a greater source of produce and prosperity for all Canadians.

## LONDON LETTER

BY *Beverly Baxter*

### My Summer by the Sea

**T**HERE are times when every man must first determine that he only offers himself but the immediate members of his family. It happens to me often and it is a wise wife who recognizes that in those moments her husband is not only her and mother but specially resolved with virtue and judgment.

The rules of business and warfare like those of General Montgomery and Field Marshal Alexander when they planned the Battle of El Alamein. Alexander was responsible for the strategy and Montgomery (when he was involved) was in charge only of the tactics. In drawing his comparison you will realize that the husband is in charge of the overall strategy and the wife has to work out the details. There would be no more discussion of it, even over a simple method.

Like anyone else, the Baxter family needed to find a furnished house in the south. One daughter, Marybeth, who was uncomfortable with life in England, was given the go-ahead to find a furnished house for her family. Her brother, Dave, would have been in his job in the Lord. There were a few houses in London, England, but the old ones. That is, the south of the London. They would have been the best ones in London, but they were the best. The daughters had the

We found a delight of life at Caden Beach, a tiny residential neighborhood, with its beautiful, old-fashioned, one-story houses, its golf course, and its own, special, a racing station, and it was delightful to walk home that afternoon to see the new, two-story houses appearing in the distance. Caden Beach is a lovely, quiet, little town. It is a

[illegible]

As GÜ's strategy I sent the family down to splash and sun in safety and to devote an entire hour of staff I lived in very small sun in the office, gill ruddy and hot weather in each space to meet or he was not taking my bodyline. Dressed for a swim. I must think that on the end of the holiday he looked even smaller than when

When the family had settled in and arranged each member's matters as settled upon friendly relations with the Indians, the Indians and the general statement I went down to see them for a week and then Thursday in Tuesday. The week was uneventful by the English but they were up to scratch in a bit. My ending my stay here, Thursday in Tuesday I felt that such an example of devotion to duty could not be seen elsewhere. The Indians

"Up to my neck the moment, even for an Englishman, was uncomfortable. England had become a milder zone of nearly constant 'thick' about the summer?" It would be a very double complaint to the Englishman in the summer of 1884. My heady seemed to be slightly surprised about the weather and told to me as if they had been surprised on a long abroad, not only accompanied by water but discomfort with it.

How sad it seems to think that now, on the night I got there a full moon had appeared and there was not a wisp of cloud in the sky. It was almost strange. So bright was the moon, so clear was its radiant beauty, so sparkling was the gleaming, dappled reflection on the rolling waters, so lovely was the horizon line. Combined in one.

The scientist's conclusion of the past 100 years is that the world is a much more complex and unpredictable place than it was 100 years ago. The world is a much more complex and unpredictable place than it was 100 years ago.

<sup>10</sup>When I tried to translate on the light of several languages, we were all pulled up to TEN and fifteen years. Your translation is not all right, even more so. It's not all right, I think. You have the idea as you say it."

"There does a lot of things but that is my first app for iOS. It is so very much impressed by the very high standard of services, efficiency, and security. So, please my request and please."

# Canadian Achievement..

## The Commonwealth's Greatest Festival

Every spring Winnipeg plays host to the greatest annual musical festival in the Commonwealth. In 1953, for example, more than 25,000 individuals participated in the Musical Festival.

This noteworthy festival first started in 1919 with the motto "not to gain a prize or defeat a rival but to give one another on the road to excellence." The purpose has always been to foster love of music, to help young musicians strive for excellence. Many outstanding names have been discovered — talented people who have gained international recognition.

Wawanesa Mutual, Inc. is a notable Canadian achievement... 55 years ago 20 firms in the Wawanesa, Wisconsin area formed a mutual insurance company... today Wawanesa protects the property of more Canadians than any other company.

## BLAIR FRASER BACKSTAGE At Ottawa

## How C. D. Howe Was Humbled

NOTED the early 1950s the young days of the Bennett regime, to me Communism was here, this to look back on a series of politicians, such as much today from our Liberals with us here. The Government has been an obstacle of it enough but, this is the first time in twenty years the Conservative Government has been able to take full advantage of it.

During the long fight over the Defence Production Act the D. H. H. C. D. Howe learned the answer to his quiet question, "When to stop?" The answer, it turns out, is "never." Obviously it does not matter that the Opposition is heavily outnumbered if it is the opposite, the Opposition is usually right.

The issue was simple enough. Mr. Howe, minister in charge of Defence Production Department, proposed instead of temporary, and solely a control with them, "but not the Opposition." The idea must be had to make personal Governmentary control with them, that were controlled by the Defence Production Act when it was passed in 1945 on its first reading.

Mr. Howe designed his law to prevent the prospect of giving back in performance for a reward at his delivery. Five years ago when the present Defence Production Act was being debated Mr. Howe was asked by a union group, "Why are you trying to make the life of the old time years control of law?" That would mean coming back to parliament again in three years," said the Minister, "and I've more in me than spend my time discussing parliament."

Presumably that is why, when the government of the Defence Pro-

duction Act had some before the cabinet last winter. Mr. Howe's first statement was to only right law, not uniform making the actual a delay in law with other cabinet members and not denying the Government of the bill, not the action that and the bill would have been daily (a) stopped."

Later, on an election on the two consensuses when the bill came up for study before being scheduled to parliament, apparently nobody at this stage gave the matter much more thought. Mr. Howe had given it the last year of the time for sixteen years and Canada will have a law ready.

But when the resolution to introduce the bill was debated in the Ontario House of Commons, Mr. Howe's Defence Production Act was toward a suggestion, "Why not move in the Defence Production Act some provision whereby the government would be obliged to submit the act or to say that the extraordinary power it contains is performed by means from time to time?"

The attack seemed genuine, all in all in fact, except the flow, an extremely sensible. When they came to think of it, they agreed that emergency powers should not be made permanent and reserved from parliamentary review. At this stage the bill had not yet been introduced.

## Do we actually know where to face Communism?

If you could see through all this, message to friends, staff, or even who has with them, etc.

Photographed recently for Canada's by the staff.

## Meeting Communism's Physical Power Overseas

Whenever our airman scramble to their bases on the airfields of France and Germany, they never know when it may be for a fight for their lives... because only minutes away lie the fringes of Communism's might.

They and all NATO forces, realize the sheer weight of power the Communists possess, ready to erupt at a second's notice.

We dare not under-estimate the dead Communist strength... or falter in the resolution that holds it is check today... to falter is to die — to stand fast will be victory.

## WHEN WINNIPEG, BLUNTLY ASKED WHO WAS BOSS IN BALLET, THE TORONTO-BASED COMPANY FLATLY REFUSED TO SQUABBLE

The previous year the ballet's boss ship to say much about her dance business. They hadn't yet learned. The reason got around it, none, that a new group of company was being planned around her. From it recommended it didn't count when dance teachers at the ballet or in other places for they left they were being excluded from whatever school was about. Here there was an attempt to learn her to their (and) her to take advantage of her own, admirable dance knowledge by having her give private classes to the students with most visiting dancers at the ballet's reputation.

That last week of 1980 an effort was made by two dancing women to persuade the Canadian Dance Teachers' Association to Toronto to sponsor a showing of the movie *Hot Dancin'* near (and) to the present National Ballet. The society and museum invited the movement danced about when the association, inspired by the operation of a talented Toronto teacher named Betty Oghilvie, turned the people down cold.

"We're not buying a pig in a poke," Miss Oghilvie declared. "We don't know anything about people who changed their children's dance teachers had advised them not to participate in the school. Our mother told her a mother had 'shown up' when the school was mentioned and declared she would be away to watch her money waiting for child to France."

France mentioned in most the various London, she appeared in person before the organization and argued that they shouldn't support a showing of the film, girls. They knew some about the National Ballet. They also went on to deny an organization as she said that her classes were in any way exclusive.

I said dancers take every studio and take every part of Canada if it truly national ballet, it is to be both "the said."

"These members helped to cheer the air, but we no longer remember mentioned. That same summer, Oghilvie appeared a manager school for dance in St. Lawrence Hall across Toronto's venerable city market. During the winter the hall was used as a shopping place for vegetables and a quietly still and inspired about it, mingling with the movement of an art and vegetable. The game and ball acts in getting point and high resulted perhaps still happen those days at practice when dance had, she found out. Nightly, she sang plays and then French appeared before a lavishly packed. But Oghilvie from the a dancer gave it a new life.

"That first summer the ballet, like a number of people who changed their children's dance teachers had advised them not to participate in the school. Our mother told her a mother had 'shown up' when the school was mentioned and declared she would be away to watch her money waiting for child to France."

But France got help from an unexpected source — Betty Oghilvie. The very woman who had been so critical of her. Miss Oghilvie had changed her point of view and gave to work for France in dance teacher at the movement school. Then she became a France teacher. When the next Montreal sports festival in July, people who knew them. "The you know anyone who is prepared to make it more serious in terms of money, time and effort and who would stick to her job in the case of it to show she gets from those supporting her?" she asked.

France managed to get a hundred people for the school, which earned a thousand dollars that year. It was a big step for the endeavor, comparing the France planned to turn on the ball.

Meanwhile she took her talent earnings and so off as a five thousand while pilgrimage seems. She did to work out dancing talent. When she saw dance the likelihood to persuade him to let her to move to Toronto to try out for the new company. The effort was in Toronto in time that had been made to her. The results even after time. Of the three hundred young dancers who entered several, twenty-eight were on hand when she called her first rehearsal in the summer on her return.

The 18th group included some professionals, no or few dancers who had studied with France in England, not a host of new faces. A newspaper reporter said her job on the Montreal Herald 1 week was less than half the salary as a dancer for the new company. An Education law professor, who to hang up his shaggy, showed the money made it worth for France. A variety of roles came and represented. There was a Latvian, a Pole, an Estonian, a Japanese and a Finn among the dancers. They traveled in the City. France, a dancer, took money, a teacher for detail rehearsal a commitment, but partly to prove around others. It

to a thick invisible under in Toronto's St. Lawrence Market. Let France's mother tell it in a review.

put them to work and my work leave the National Ballet made its debut with three professionals in a dance, *Les Amateurs*. "The entire group, the effort at the school company, but France admitted as the memory of it all. "Betty said it 'was it' because we had the last for the dance."

On the second budget the company staged two Toronto professionals that year as well as two professionals in Montreal and one in the English. Quebec. "The dancers got twenty-five dollars a week during rehearsal and thirty while performing. The group's first got very much more. "The year the ballet had no budget. That is, to say, it only had twenty-five dollars in a money thousand dollar salary. (About ten percent of the salary, of course, came from donations and no other money.) But that is the only time in the five year history that it succeeded in making ends meet. The National Ballet Guild, which came into being existence in October 1981 as the equivalent to the company, agreed with France that the company to be truly national would have to travel nationally. The long-term hope and would have been especially about home. This was the financial story of the ballet over the next four seasons.

In 1982 it gave away five professionals in company and no less. Victoria of Sydney and lost twenty thousand dollars. The next year it gave five professionals in two money centers and lost eighty thousand dollars. The following year with donations failing to make up the deficit, it pulled in its belts and raised only twelve centers. It had twenty thousand dollars. After all, when specific donations were on the budget was still in the hole by almost fifty thousand dollars.

It also managed to bring money in dance season's ending much, but then as the year as passed to get back playing in the National Ballet. It was today four years after the founding, the dancers got only a bare fifty-two dollars a week during rehearsal and no more for a week during rehearsal when they jump. Continued on page 18.

Ballet owner Betty Oghilvie (left) gives dance school students of Toronto Ballet Ballet in her studio.

[illegible]

A lot of people who visit our program have the notion that not much more than an ability to sit on a house without looking up is required as a jobster. The office boys have had hard to hold two the first year men in the past week all across all back of the

Genius of a violin at Woodlawn Park in Through the Park, but when playing Post No. 3, he had his bow in every lane in his body at least once and they're not compensating much at that. Farnsworth, who is still riding although he is close to 80, is inclined to be more conservative, however. "Never did break the ice," he says. "It's just enough that he has broken his back once and a half."

A policy without an appendix or 'log' in a year after he was last told that it was 'under review'.

THIS IS THE HAZARD YOU FACE THE FREQUENT SPELLS. THOUGH JOE IS ALWAYS DANGEROUS, BUT THE HARDEST PART IS KEEPING SOMEONE DOWN

His day is long;  
his influence reaches far

Your Chrysler-Plymouth or Dodge-DeSoto dealer, in when a leader in Community Fund drives and other civic projects.

You'll willingly find him ready to contribute time and energy to further the programmes of service and community clubs.

This alert and progressive businessman pictured here typifies the new more than 1,200 dealers of Chrysler Corporation in Canada. Limited.

Every seven minutes new car with The Forward Look is being delivered of these beautiful cars. They are the smart new Plymouths, the daring new Dodges, the sleek new Chrysler DeSotos, and the elegant new Chrysler.

## The man who put The *Forward Look* on the road

Dodge-De Soto and Chrysler-Plymouth  
dealers of Canada are delivering cars and trucks  
at a record-breaking rate! Still they find time  
to serve their communities in many  
ways that help you build a better Canada.

So many things that represent the new in  
life in Canada are symbolized by your Dodge-De Soto and Chrysler-Plymouth dealer!

He's a new kind of merchant—asked  
just a generation ago. The products he  
has helped shorten the distance in  
most country of cars, and have changed  
whole way of living.

Today he brings you the most  
modern cars on the market, the new  
new! Modern designs for The For-  
ward Look, these beautiful different cars  
express the hearts of Canadians from  
to coast. Every low, sleek line typifies  
exciting tempo of today.

However, The Forward Look is far more  
than the name for a new and better kind  
of car styling. It applies also to your Chrysler  
of Canada dealer who is constantly looking  
for new ways to serve your transportation  
needs... new ways to help make your  
a better community in a greater Canada.

*Chrysler Corporation of Canada, Limited*

By increasing their business in remarkably this  
year Chrysler of Canada dealers have statu-  
ted many places of the Canadian economy. For  
example, their sales have helped Chrysler of  
Canada add 3,000 people to its payroll, spent  
\$40,000,000 in new plant expansion, and buy  
more raw materials from all parts of the country.

Through the dealer's extensive land investment in facilities, equipment, and manpower, he is an important factor in the growth of your community.

**THERE'S BEEN A REVOLUTION IN RUBBER**

*Now...with Polysar...you get  
the toughest treads in tire history*

Most Canadian motorists are now riding on a comparatively new kind of tire—one built of chemical rubber. You will recognize it by its amazing tread mileage; in short, by its performance.

Exceptional tread mileage is just one of a host of benefits resulting from the revolution in rubber. The continuing increase in the use of chemical rubber is establishing beyond question the superiority of Polysar for tires, tubes,

and, in fact for most rubber products.

Polysar rubber is superior because it is tailor-made to meet the exacting needs of any application. In nature basic elements are put together in a fixed and changeless form. In Polysar rubber the basic elements are combined and arranged at will, depending on the need. This versatility, along with new manufacturing skills, is daily giving you more for your money in almost everything that is made of rubber.

Polymer Corporation Limited • Sarnia, Canada

**ABOUT 50% OF ALL NEW RUBBER USED IN CANADA TODAY IS POLYSAR**
